

Clouds

Clouds maintenance

Clouds are made of flameproof polyethylene foam pressed into shape with the selected upholstery fabric.

Regular cleaning is important to maintain the appearance and prolong the life of the material. Dust and dirt wear the material and also reduce its fire-retardant properties.

Normal cleaning

Vacuum regularly. Dust can also be removed using a soft brush.

Stains should be removed immediately. Most types of stains can be removed by carefully dabbing with a clean, lint-free cloth or sponge wrung out in warm water.

Remove greasy stains by using appropriate detergents or solvents. In all cases, we recommend to test stain-removal agents on an inconspicuous area first, to see if there are any effects on the cover.

Warning – do not rub the material hard because this could result in damage to the nap, if any.

For large stains, individual *Clouds* can be sent for professional cleaning.

One or more *Clouds* can also be replaced if cleaning is not possible.

Warning – be careful when using solvents because these could dissolve the foam beneath.
